

Excelsys with IMCA Electronics for distribution in Turkey

June 17, 2013 // Julien Happich

Excelsys Technologies has added IMCA Electronics to its global distributor network. IMCA will distribute solutions from Excelsys Technologies to customers in a variety of specialist markets including Military, Industrial, Medical, and Communications in Turkey.

IMCA's successful engineering driven demand-creation capabilities will help Excelsys generate new opportunities in Turkey. The expert sales and applications teams at Excelsys will work together with IMCA provide additional power options, rapid design-in and applications support, easing system integration and helping customers meet their business needs. Excelsys recently exhibited in co-operation with IMCA at the IDEF'13 International Defence Industry Trade Show in Turkey. Excelsys exhibited the XF family of Hi-Rel COT's modular, [power supplies](#) from 400W to 1000W, operational over a wide temperature range from -55 to 70°C and with efficiencies greater than 90%.
