Excelsys Technologies Ltd Statement on Conflict Materials

Excelsys Technologies fully supports the position of the Electronic Industry Citizenship Coalition (EICC), in avoiding the use of conflict minerals which directly or indirectly finance or benefit armed groups in the Democratic Republic of Congo or adjoining countries.

Conflict minerals include: columbite - tantalite (coltan) (i.e., tantalum), cassiterite (i.e., tin), gold, wolframite (i.e., tungsten) or their derivatives and could expand to include any other mineral or their derivative determined by the U.S. Secretary of State to be financing the DRC conflict.

To meet the obligations of Section 1502 of the Dodd - Frank Act, we have implemented a comprehensive due - diligence process. It has been verified that Excelsys suppliers, including contractors and external manufacturers, do not have tantalum, tin, tungsten or gold in their products; which would directly or indirectly finance or benefit armed groups that are perpetrators of serious human rights abuses in the Democratic Republic of Congo or an adjoining country.

Based upon current information provided by our suppliers, Excelsys Technologies does not knowingly use metals derived from the Conflict Region.
